

AFFIDAVIT

STATE OF Florida)
) ss:
COUNTY OF Collier)

BEFORE ME, the undersigned authority duly authorized in the State of Florida, County of Collier to take acknowledgments and administer oaths, personally appeared David P. Bolduc who, after being duly sworn on oath, according to law, deposes and says as follows:

1. My name is David P. Bolduc.
2. I make all statements contained in this Affidavit based upon my personal knowledge.
3. I am of sound mind and body, over the age of 18, and understand the obligation of an oath.
4. On numerous occasions I have addressed the Collier County School Board and met with Collier County School District Administrators to highlight a multitude of inaccuracies or misleading content contained within textbooks selected by the District Superintendent and District Staff.

For instance, contained in the 8th Grade US History textbook, it teaches the children to glorify 13th century Muslim Kings of West Africa because they made pilgrimages to Mecca with hundreds of slaves and riches extorted from local merchants. Additionally, it teaches the children to be subservient to a despotic U.S.

President by stating, "The President issues Executive Orders. These commands have the power of law." This US History textbook also states that perhaps we should eliminate the borders of the United States, and replace them with 10 cultural borders of North America.

High School Honors Biology textbooks teach that Charles Darwin's Theory of Evolution is the greatest scientific discovery in the last 200 years. This is ridiculous when you research Charles Darwin, and find he was the largest promoter of Eugenics, a race-based pseudoscience which espoused using the force of government to sterilize or separate the "unfit" from society. Darwin was such a massive promoter of Eugenics, he married his first cousin, and several of his children died at a young age, or had physical and mental challenges due to inbreeding.

Couple the above, with the fact that Collier County's Math textbooks are based on Common Core, the Math Standards which Stanford Mathematics Professor James Milgram, a member of the Common Core Validation Committee, stated would leave our students a full two years behind other high achieving Math and Science nations, and Collier County School District's textbook selection process has failed our students.

Worse yet, whenever I, or another concerned parent, meets with Collier County District Staff to address our documented textbook concerns, they are ignored and never addressed.

FURTHER THIS AFFIANT SAYETH NAUGHT.
